## PAGE 1

### PANEL 1

Establishing shot. Wide. Apollo 11 taking off from Cape Canaveral. Its a beautiful sunny Florida afternoon. ([http://media.komonews.com/images/090720\\_moon\\_landing\\_large\\_29.jpg](http://media.komonews.com/images/090720_moon_landing_large_29.jpg))

#### 1. CAPTAIN (V.O.)

After the Luna 2 showed the world that it was possible a man-made object could get to Earth's grey satellite in 1959, a race between the USA and the USSR erupted.

#### 2. CAPTAIN (V.O.)

Shamed and near bankruptcy, the Soviet leadership was cast out. The Union was quickly gobbled up by hungry democracies.

### PANEL 2

Wide shot of the Sea of Tranquility with a sprawling moon base. It's a buzzing hive of activity. (<http://cdn.wallpapersafari.com/35/38/kV0FRJ.jpg>)

#### 3. CAPTAIN (V.O.)

By 1991 the first lunar colony was set up near Armstrong's landing, aptly named Apollo. The colony quickly grew when helium-3, a fuel alternative, was found in abundance just under the top crust of the lunar surface.

#### 4. CAPTAIN (V.O.)

Meanwhile, the governments of the world had come to impasse. To stay stagnant and let all the scientific progress made disappear or stand united, share resources, wealth and care; make all equal.

#### 5. CAPTAIN (V.O.)

The decision was made. All those of good health, 18 or over, would be given free pass to colonise the Red Planet.

### PANEL 3

Wide shot. A massive spaceship is seen floating through space. ([http://www.igorstshirts.com/blog/conceptships/2012/john\\_liberto/john\\_06.jpg](http://www.igorstshirts.com/blog/conceptships/2012/john_liberto/john_06.jpg))

#### 6. CAPTAIN (V.O.)

By 2006, the newly formed United Earth Government, began the space migration programme. Our pioneers.

Our future.

7. CAPTAIN (V.O.)

It was decided three years previously that a giant covenant would take all civilians from an orbiting earth station to begin the year long journey to our nearest solar sibling.

PANEL 4

A wide shot of a bridge of a space ship with people all working around different monitors. The most massive of monitors has a picture of Mars on the horizon.

(<https://s-media-cache-ak0.pinimg.com/originals/39/f1/bf/39f1bfd815a8fa8e1bf1841b0d2bebea.jpg>)

7. CAPTAIN (V.O.)

We are almost there. The human race will continue.  
We are almost home.
